Significant flooding of roads continued for several hours after the heavy rain had ended.

A cold front moved south out of the Texas panhandle on May 6th, and was draped across north Texas on the 7th and 8th. The front stalled across the northwestern sections of north Texas and combined to produce severe thunderstorms including large hail, tornadoes, and flash flooding. Flash flooding across Cooke County caused significant impacts, including a late night train derailment.

A NWS storm survey team found EF-3 damage in the city of Van. This tornado began near highway 64, near Edom before moving in a northerly direction. The storm crossed Interstate 20 on the southeast side of Van, before carving a destructive path over the eastern side of the city. The greatest damage was done in a housing development to the north of the public school administration building, where over 50 homes were damaged or destroyed. Two fatalities occurred with this tornado, as a married couple was apparently asleep in their mobile home when the tornado hit.

Direct Fatalities: F62MH, M60MH

Amateur radio reported that trees approximately 24 inches in diameter were blown over near Chambers Cemetery on County Road 153.

An active Spring weather pattern led to numerous severe thunderstorms, many of which produced tornadoes, across north Texas during Mother's Day Weekend. The prolonged period of strong to severe storms was made possible by a slow-moving upper level low pressure system which moved east from the Rockies through the Southern Plains. Activity began on Friday and continued through Mother's Day evening.

A National Weather Service damage survey crew found tornado damage consistent with EF -1 damage in the city of Runaway Bay. This was the second of two tornadoes to affect Runaway Bay on the 19th. This tornado began over Lake Bridgeport before moving southwest into the city. Several homes were damaged, with damage ranging from superficial shingle damage to complete roof loss. One home had the second story balcony removed, and the two apartment units were considered a total loss.

WISE COUNTY --- 1.0 N BALSORA [33.13, -97.85], 2.7 ENE BALSORA [33.13, -97.81]

05/19/15 20:59 CST 0 Source: NWS Storm Survey

A National Weather Service damage survey crew found tornado damage along a two and a half mile path across western Wise County . The tornado began on the west side of Farm to Market Road 920, west of the Balsora community. As the tornado moved eastward, several homes, mobile homes, and farm buildings were damaged or destroyed. The most significant damage was done to a mobile home, where the roof was completely taken off.

WISE COUNTY --- 3.8 NW BLUETT [33.21, -97.49], 1.9 NNW BLUETT [33.20, -97.46]

A National Weather Service damage survey team found tornado damage east of the city of Decatur. The tornado took a non-standard path, with the tornado taking a due south path for approximately three-quarters of a mile, before turning due east, and then slightly southeast. The tornado damaged several storage buildings, and damaged several roofs.

JACK COUNTY --- 0.2 SSW JACKSBORO [33.22, -98.17], 0.3 SSE JACKSBORO [33.22, -98.17]

05/19/15 22:04 CST 80K Tornado (EF0, L: 0.16 mi , W: 30 yd) 05/19/15 22:05 CST 0 Source: NWS Storm Survey

A National Weather Service damage survey crew found evidence of a brief tornado in the city of Jacksboro . The tornado moved in a southeast to northwest direction, beginning near the intersection of 4th street and Pine. The tornado moved northwest for approximately three blocks, damaging several trees, and producing roof damage to four homes.

WISE COUNTY --- 4.3 NW LAKE BRIDGEPORT [33.26, -97.92], 3.9 NW LAKE BRIDGEPORT [33.26, -97.92], 3.1 NNW LAKE BRIDGEPORT [33.26, -97.88], 3.9 WSW CHICO [33.28, -97.88]

Flooding across Dallas County persisted from Sunday the 24th, until the early morning hours of Thursday, May 28th. In Dallas, Loop 12, underneath the Interstate 30 overpass was closed for several days thanks to flood waters. Other areas in the county sustained an extended period of flooding, from Duck Creek in Garland, to the Trinity River in Dallas, which submerged parts of several city streets for nearly a week.

A National Weather Service damage survey team found evidence of a nearly six mile tornado path across much of Coryell County and an extremely small part of Fort Hood. The tornado began near Farm to Market Road 580 where it crosses Table Rock Creek. From there, the tornado moved north, and eventually northeast before it dissipated just east of Farm to Market Road 116 near Shell Mountain Road. There were six homes which suffered damage, including one which had the roofing material removed. The most extensive damage was done to an historic cemetery, where all but one tree was damaged, uprooted, or both.

A National Weather Service damage survey team found evidence of an EF-0 tornado across portions of northern Fannin County. The tornado began near the Duplex community, where it damaged several trees and a roof on a church. The tornado then moved northeast, damaging two homes, and uprooting several trees along Fannin County roads.

A minivan with three passengers was carried away by flood waters in the Leon River at Coryell County road 321 just after 10 AM on Sunday, May 31st. The Coryell Sheriff's Office says the believe the driver tried to cross a low water crossing when the current swept the car away. Crews located the car submerged under nine feet of water. The Leon River remained high until the 3rd of June, when the water receded enough to locate the vehicle.

Direct Fatalities: F84VE, F11VE, F63VE

The end of May brought widespread flooding to north and central Texas. By the end of the month, the region had essentially erased a four year drought in less than four weeks. Several area lakes were in surcharge capacity and releasing water downstream. The city of Dallas was impacted most of all, with one major highway closed for nearly a week due to flooding. Occasional bouts with severe weather also occurred during the final 5 days of May.
